

Construction Update

**GOOSE
CREEK
GRADE**

June 8, 2015

On **Monday (June 15)**, construction will begin to improve Idaho 55 between McCall and New Meadows. The project includes removing trees, widening the shoulders and improving the roadway to enhance safety and visibility on **Goose Creek Grade**.

Construction will continue through the summer and is expected to be complete in October.

WHAT TO EXPECT DURING CONSTRUCTION

- Goose Creek Grade will be reduced to one lane in the work zone with **daytime delays of up to 30 minutes**. The speed limit will be reduced to 35 mph.
- Work will be done in the daytime from **7 a.m. to 7 p.m. Monday-Thursday**, and **until noon on Friday**.
- There will be **up to two work zones** in operation at the same time. Each work zone will have two signal lights; one at each end.
- Rock blasting will require several closures of up to two hours each, between 6 and 10 p.m. **ITD will provide five days advanced notice for these closures.**

ITD reminds drivers to **plan extra time** for summer travels, **slow down** and **pay attention** in the work zone.
